

Business Requirements Document — Agents

Platform: Zebu Helpdesk — Staff Portal (Flutter, Android/iOS) **Module:** Agents (Directory) **Document Version:** 1.0 (Initial Edition)
Date: August 2026 **Status:** In Progress (case-by-case) **Classification:** Internal Use Only

Document Control

Field	Value
Document Title	Agents — Business Requirements Document
Module Scope	The Agent Directory — a read-only colleague directory listing the active agents, with a searchable list and a per-agent profile sheet (contact details, department, role, availability, and open-ticket count). This document specifies functional behaviour only — visual styling (colours, themes, animation) is out of scope.
Audience	Quality Assurance, Product Management, Engineering
Source Truth	Flutter source at <code>lib/features/agents/agents_directory_screen.dart</code> , <code>lib/models/me.dart</code>

6. Functional Requirements

6.1 AG-001 — Agent directory list

Field	Value
Description	The Agent Directory lists the active agents, with a search box that filters the list live by name, and loading / error / empty / refresh handling.
Acceptance Criteria	- The app bar title reads Agent Directory - The list is loaded from the agents meta list on open - A search box with the placeholder Search agents filters the list live as the user types (matching the typed text against the agent name, case-insensitive); clearing it restores the full list - Each row shows the agent's avatar, name, and a chevron indicating it is tappable - Tapping a row opens that agent's profile sheet (AG-002) - While loading, a loading view is shown; on failure an error view with retry is shown; when the (filtered) list is empty, an empty state reading No agents found is shown - The list supports pull-to-refresh, which reloads the agents
Priority	High

6.2 AG-002 — Agent profile sheet

Field	Value
Description	Tapping an agent opens a bottom sheet that loads and shows that agent's full profile.

Field	Value
Acceptance Criteria	- The sheet opens and loads the agent's profile; a loading indicator is shown while fetching, and the server error message is shown if the load fails - The sheet header shows the agent's avatar and name, with an availability indicator reading Available or Unavailable - The profile shows, when present, labelled rows for Email, Phone, Department, and Role - An Open tickets row always shows the agent's current open-ticket count - Rows whose value is absent are omitted (Email/Phone/Department/Role are conditional; Open tickets is always shown)
Priority	Medium

Document in progress — additional cases added after individual approval.
