

Business Requirements Document — Canned Responses

Platform: Zebu Helpdesk — Staff Portal (Flutter, Android/iOS) **Module:** Canned Responses **Document Version:** 1.0 (Initial Edition) **Date:** August 2026 **Status:** In Progress (case-by-case) **Classification:** Internal Use Only

Document Control

Field	Value
Document Title	Canned Responses — Business Requirements Document
Module Scope	The Canned Responses (saved replies) surfaces: the list, the response detail sheet with copy, and the create / edit / delete flows. This document specifies functional behaviour only — visual styling (colours, themes, animation) is out of scope.
Audience	Quality Assurance, Product Management, Engineering
Source Truth	Flutter source at <code>lib/features/canned/canned_screen.dart</code> , <code>lib/models/canned.dart</code>

6. Functional Requirements

6.1 CR-001 — Canned responses list

Field	Value
Description	The screen lists the saved canned responses as cards, paginated, with a create action and per-card edit/delete menu.
Acceptance Criteria	- The app bar title reads Canned Responses - The list is paginated (fetches further pages as the user scrolls) - Each card shows the response title and a two-line plain-text preview of the body; a Disabled chip is shown when the response is not enabled and a Global chip when it is global - Each card has an overflow menu with Edit and Delete - Tapping a card opens its detail sheet (CR-002) - When there are no responses, an empty state reading No canned responses is shown - A floating action button opens the create editor (CR-003)
Priority	High

6.2 CR-002 — Response detail sheet

Field	Value
Description	Tapping a response opens a sheet showing its full body, notes, attachments, and a copy action.

Field	Value
Acceptance Criteria	- The sheet is titled with the response title and shows the full response body (rendered from its HTML) - When the response has notes, a Notes section shows them - When the response has attachments, an Attachments section lists them (they open in the shared attachment viewer — see Global BRD, GL-001) - A Copy button copies the response body as plain text to the clipboard, closes the sheet, and shows a Copied toast
Priority	Medium

6.3 CR-003 — Create / edit response

Field	Value
Description	A sheet creates a new response or edits an existing one, with a title, body, and enabled toggle.
Acceptance Criteria	- Creating opens a sheet titled New canned response; editing opens Edit response pre-filled with the current values - The sheet shows a Title field, a multi-line Response field, and an Enabled toggle (on by default for a new response) - The submit button reads Create when creating and Save changes when editing; it shows a busy indicator while saving - On success the sheet closes and the list refreshes - On an API error with field errors, each is shown inline under its field (title, response); a general error is shown as a toast
Priority	Medium

6.4 CR-004 — Delete response

Field	Value
Description	Delete a canned response.
Acceptance Criteria	- Delete shows a confirmation reading Delete response? with the message Delete "{title}"? This cannot be undone. and a destructive Delete confirm - On confirm, the response is deleted, a toast reads Deleted, and the list refreshes - On failure the server error is shown as a toast
Priority	Medium

Document in progress — additional cases added after individual approval.
