

Business Requirements Document — Knowledgebase (FAQ)

Platform: Zebu Helpdesk — Staff Portal (Flutter, Android/iOS) **Module:** Knowledgebase / FAQ **Document Version:** 1.0 (Initial Edition) **Date:** August 2026 **Status:** In Progress (case-by-case) **Classification:** Internal Use Only

Document Control

Field	Value
Document Title	Knowledgebase — Business Requirements Document
Module Scope	The Knowledgebase (FAQ) surfaces: the Knowledgebase screen that either browses categories or searches articles, and the article detail screen. This document specifies functional behaviour only — visual styling (colours, themes, animation) is out of scope.
Audience	Quality Assurance, Product Management, Engineering
Source Truth	Flutter source at <code>lib/features/faq/faq_screen.dart</code> , <code>lib/features/faq/faq_detail_screen.dart</code> , <code>lib/models/faq.dart</code>

6. Functional Requirements

6.1 FQ-001 — Knowledgebase screen: browse vs search

Field	Value
Description	The Knowledgebase screen browses categories when no search is entered and shows article search results when a query is entered.
Acceptance Criteria	- The app bar title reads Knowledgebase - A search box with the placeholder Search articles applies on submit (not on every keystroke); clearing it returns to the category browse view - When the search is empty, the category browse view (FQ-002) is shown; when a query is present, the search-results view (FQ-003) is shown
Priority	High

6.2 FQ-002 — Category browse

Field	Value
Description	The browse view lists knowledgebase categories as expandable tiles that lazily load their articles.

Field	Value
Acceptance Criteria	- Categories are loaded on open; while loading a loading view is shown, on error an error view with retry, and when there are none an empty state reading No categories - Each category is an expandable tile showing its name and its article count - Expanding a category loads its articles on first open (showing a spinner while loading, an error view with retry on failure, or No articles in this category. when empty) - Each article row shows the article question, a Public/Internal chip, and (when present) its category chip; tapping it opens the article detail (FQ-004) - The browse view supports pull-to-refresh
Priority	Medium

6.3 FQ-003 — Article search results

Field	Value
Description	When a query is entered, the screen shows a paginated list of matching articles.
Acceptance Criteria	- Matching articles are shown as a paginated list - Each row shows the article question, a Public/Internal chip, and (when present) its category chip; tapping it opens the article detail (FQ-004) - When no articles match, an empty state reading No articles found with the hint Try a different search term. is shown
Priority	Medium

6.4 FQ-004 — Article detail

Field	Value
Description	The article detail shows the full question, answer, attachments, notes, and timestamps.
Acceptance Criteria	- The app bar title reads Article; while loading a loading view is shown and on failure an error view with retry - The body shows the article question, a visibility/type chip (the article's type, or Public/Internal), and (when present) its category chip - The article answer is shown as plain text (its HTML is stripped for display) - When the article has attachments, an Attachments section lists them (they open in the shared attachment viewer — see Global BRD, GL-001) - When the article has notes, a Notes section shows them - A footer line shows "Created {date} · Updated {date}"
Priority	High
