

Business Requirements Document — Navigation Shell

Platform: Zebu Helpdesk — Staff Portal (Flutter, Android/iOS) **Module:** Navigation Shell **Document Version:** 1.0 (Initial Edition)
Date: August 2026 **Status:** In Progress (case-by-case) **Classification:** Internal Use Only

Document Control

Field	Value
Document Title	Navigation Shell — Business Requirements Document
Module Scope	The app's bottom-navigation shell: the four primary tabs, the raised center "create" button and its speed-dial, the Inbox unread badge, and the tab-switching behaviour. This document specifies functional behaviour only — visual styling (colours, themes, animation) is out of scope.
Audience	Quality Assurance, Product Management, Engineering
Source Truth	Flutter source at <code>lib/features/shell/home_shell.dart</code> , <code>lib/features/shell/widgets/floating_nav_bar.dart</code>

6. Functional Requirements

6.1 NV-001 — Bottom navigation tabs

Field	Value
Description	The shell hosts a bottom navigation bar with four destinations and reveals the currently active branch content above it.
Acceptance Criteria	- The bottom bar shows four tabs in this order: Home, Tickets, Tasks, Inbox - Tapping a tab switches to that branch and marks it selected; the branch content is shown above the bar - The Inbox tab shows a red unread-count badge when there are unread notifications (showing 99+ above 99); the badge is hidden when the count is zero - The fifth destination (More) is not on the bar — it is reached from the Dashboard header (see the More module) - Re-tapping the already-active tab resets that branch to its initial location
Priority	High

6.2 NV-002 — Center create button and speed-dial

Field	Value
Description	A raised "+" button at the center of the bar opens a speed-dial to create a new ticket or task; it does not switch tabs.

Field	Value
Acceptance Criteria	- A raised + button sits at the center of the bar between the Tickets and Tasks tabs - Tapping it opens a small popup above the button offering New ticket and New task, over a tap-to-dismiss scrim; tapping the button again (or the scrim) closes the popup - Choosing New ticket opens the create-ticket screen; choosing New task opens the create-task screen - The create button does not change the selected tab
Priority	High

6.3 NV-003 — Shell lifecycle

Field	Value
Description	Reaching the shell means the agent is authenticated, so push notifications are initialised.
Acceptance Criteria	- On first reaching the shell (post-authentication), the push-notification service is started (permission prompt + token registration); this is a no-op when push is not configured - The four branches retain their own state as the user switches between tabs
Priority	Low

Document in progress — additional cases added after individual approval.
