

Business Requirements Document — Users

Platform: Zebu Helpdesk — Staff Portal (Flutter, Android/iOS) **Module:** Users **Document Version:** 1.0 (Initial Edition) **Date:** August 2026 **Status:** In Progress (case-by-case) **Classification:** Internal Use Only

Document Control

Field	Value
Document Title	Users — Business Requirements Document
Module Scope	The Users (end-user / requester directory) surfaces of the Staff Portal: the Users list (search, pagination, create), and the User detail screen (header with the user's contact details, the Tickets / Notes tabs, and the account actions — edit, clear organization, register / lock / unlock / reset-password, delete). This document specifies functional behaviour only — visual styling (colours, themes, animation) is out of scope.
Audience	Quality Assurance, Product Management, Engineering
Source Truth	Flutter source at <code>lib/features/users/users_list_screen.dart</code> , <code>lib/features/users/user_detail_screen.dart</code> , <code>lib/models/user.dart</code>

6. Functional Requirements

6.1 US-001 — Users list

Field	Value
Description	The Users list shows every end user, searchable and paginated, each row summarising email and organization.
Acceptance Criteria	- The app bar title reads Users with the total count shown below it as "N total" - A search box with the placeholder Search users narrows the list; the search applies on submit (not on every keystroke), and clearing it restores the full list - The list is paginated (fetches further pages as the user scrolls) - Each row shows the user's name, avatar, and a subtitle of the email, or "{email} · {organization}" when the user belongs to an organization - Tapping a row opens that user's detail screen (US-003) - When there are no users (or none match the search), an empty state reading No users with the hint Try a different search. is shown - A floating action button opens the create-user sheet (US-002)
Priority	High

6.2 US-002 — Create user

Field	Value
Description	A sheet creates a new user with a name, email, and optional phone.

Field	Value
Acceptance Criteria	- The sheet is titled New user and shows Name (auto-focused), Email, and Phone (optional) fields, using the appropriate keyboards for email and phone - The Create user button submits; while saving it shows a busy indicator - On success the sheet closes, a toast reads User created, and the list refreshes - On an API error with field errors, each is shown inline under its field (name, email, phone); a general error is shown below the fields
Priority	Medium

6.3 US-003 — User detail: load, header, and states

Field	Value
Description	Opening a user loads their record and shows a header of their contact details above the tabs.
Acceptance Criteria	- The app bar shows the user's name (or User until loaded) and an overflow menu of account actions (US-007) - While loading, a loading view is shown; on failure an error view with retry is shown - The header shows the user's avatar, name, email, phone (when present), and their organization (when present) - When the user has custom fields, each is shown as a labelled key/value row below the contact block
Priority	High

6.4 US-004 — User detail tabs

Field	Value
Description	The detail body is organised into two tabs.
Acceptance Criteria	- Two tabs are shown in this order: Tickets, Notes, selectable by tap or swipe - Each tab loads its own content (US-005, US-006)
Priority	Medium

6.5 US-005 — Tickets tab

Field	Value
Description	The Tickets tab lists the tickets belonging to the user.
Acceptance Criteria	- The tab shows a paginated list of the user's tickets as ticket cards - Tapping a ticket opens that ticket's detail screen - A user with no tickets shows No tickets
Priority	Medium

6.6 US-006 — Notes tab

Field	Value
Description	The Notes tab lists internal staff notes on the user and lets an agent add or delete notes.

Field	Value
Acceptance Criteria	- The tab loads and lists the user's notes, each showing the note body and a line of "{staff name} · {relative time}"; a loading view and an error view with retry are shown as appropriate - An input at the bottom with placeholder Add a note... and a send button adds a note; an empty note is ignored; while adding, a busy indicator is shown - On a successful add, the input clears and the list reloads - Swiping a note row from right to left deletes it (reloading the list); failures show an error toast - A user with no notes shows No notes
Priority	Medium

6.7 US-007 — Account actions (edit, organization, account state, delete)

Field	Value
Description	The overflow menu edits the user, clears their organization, performs account-state actions, or deletes the user.
Acceptance Criteria	- The menu offers, in order: Edit, Clear organization, then Register account, Lock account, Unlock account, Reset password, then Delete - Edit opens a sheet titled Edit user pre-filled with the current Name, Email, and Phone; Save changes submits (busy indicator while saving); on success the sheet closes, a toast reads User updated, and the detail reloads; field errors are shown inline (name, email, phone) with a general error below - Clear organization removes the user's organization link, shows a toast Organization cleared, and reloads (server error shown as a toast on failure) - Register account, Lock account, Unlock account, and Reset password each run the corresponding account action and show the server's result as a toast (or the server error on failure) - Delete shows a confirmation reading Delete user? with the message This cannot be undone. and a destructive Delete confirm; on confirm the user is deleted, a toast reads User deleted, and the screen closes back to the list (server error shown as a toast on failure)
Priority	Medium
